

# V. LOHITH

## PYTHON DEVELOPER | AI & MACHINE LEARNING

Tiruppur, Tamil Nadu, India | +91 9043871380 | lohithv0126@gmail.com

[linkedin.com/in/lohith-v-984176296](https://linkedin.com/in/lohith-v-984176296) | [github.com/lohithv0126](https://github.com/lohithv0126)

### PROFESSIONAL SUMMARY

BCA graduate focused on Python, Artificial Intelligence, and Machine Learning, with a strong foundation in Python programming, data manipulation, machine learning workflows, and practical AI application development. Familiar with NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, deep learning frameworks, APIs, Generative AI, computer vision, and Python automation. Interested in developing intelligent automation and AI-powered software solutions.

### TECHNICAL SKILLS

|                                  |                                                                                                                                               |
|----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Programming:</b>              | Python, Java, SQL, HTML, CSS                                                                                                                  |
| <b>Python &amp; Data:</b>        | OOP, Data Structures, Exception Handling, File Handling, NumPy, Pandas, Matplotlib, Seaborn, Jupyter Notebook                                 |
| <b>Machine Learning:</b>         | Scikit-learn, Data Preprocessing, EDA, Feature Engineering, Regression, Classification, Decision Trees, Random Forest, KNN, SVM, K-Means, PCA |
| <b>Deep Learning:</b>            | Neural Networks, CNN, TensorFlow, Keras, PyTorch                                                                                              |
| <b>AI / GenAI:</b>               | NLP, Transformers, LLM APIs, Prompt Engineering, Embeddings, RAG, Firebase AI Studio                                                          |
| <b>Computer Vision:</b>          | OpenCV, Haar Cascade, LBPH Face Recognition                                                                                                   |
| <b>Automation &amp; Backend:</b> | Selenium,undetected-chromedriver, Flask, FastAPI, Streamlit, Requests, Telegram Bot API                                                       |
| <b>Tools:</b>                    | Git, GitHub, VS Code, Firebase, Node.js, Linux, CSV                                                                                           |

### PROJECTS

#### Naukri Automated Job Application System

*Tech Stack: Python, Selenium, undetected-chromedriver, Requests, CSV, Telegram Bot API*

- Developed a Python automation tool for job searching and application workflows on Naukri.com.
- Automated job discovery based on keywords, experience, and target locations, with handling for direct applications and external employer redirects.
- Implemented structured CSV reporting for automated and external applications and Telegram notifications for application updates and external links.

#### Face Recognition Attendance Management System

*Tech Stack: Python, OpenCV, LBPH, Haar Cascade, Tkinter, NumPy, Pandas, Pillow, CSV, pyttsx3*

- Developed a desktop attendance application that captures facial images through a webcam and recognizes registered users using an LBPH model.
- Implemented user registration, face image capture, model training, automatic attendance, manual attendance, and attendance report modules.
- Recorded enrollment number, name, date, and time in CSV attendance files and provided tabular attendance viewing.

#### AI-Powered Document Assistant

*Tech Stack: Python, LLM, RAG, Embeddings, Pandas*

- Developed a document question-answering application using Generative AI principles.
- Processed documents into chunks, generated vector embeddings, and implemented semantic retrieval to find relevant context.
- Passed retrieved context to an LLM to generate precise answers with source tracing.

#### AI-Integrated Full-Stack Web Application

*Tech Stack: Node.js, Firebase, Tailwind CSS, Firebase AI Studio*

- Developed a student and teacher platform with role-based login, timetable management, and resource sharing.
- Integrated AI assistance using Firebase AI Studio to streamline user tasks and consolidate resources into a single interface.

#### Machine Learning Prediction System

*Tech Stack: Python, Pandas, Scikit-learn, Matplotlib*

- Built an end-to-end ML pipeline covering data cleaning, EDA, feature engineering, model training, and prediction.
- Evaluated multiple algorithms using validation metrics and optimized model parameters for inference.

### EDUCATION

#### Bachelor of Computer Applications (BCA)

Chikkana Government Arts College, Tiruppur, Tamil Nadu, India | Graduated: June 2026

Artificial Intelligence & Machine Learning | Python Programming | Data & Software Development

### CERTIFICATIONS & COURSEWORK

- Python Programming – Infosys Springboard (fundamentals, problem-solving, and logic building)
- Web Development and Fundamentals – IBM SkillsBuild
- Relevant Coursework: Python Programming, C++ Programming, Java Programming, Database Management Systems, Artificial Intelligence, Machine Learning, Linux, Software Engineering
